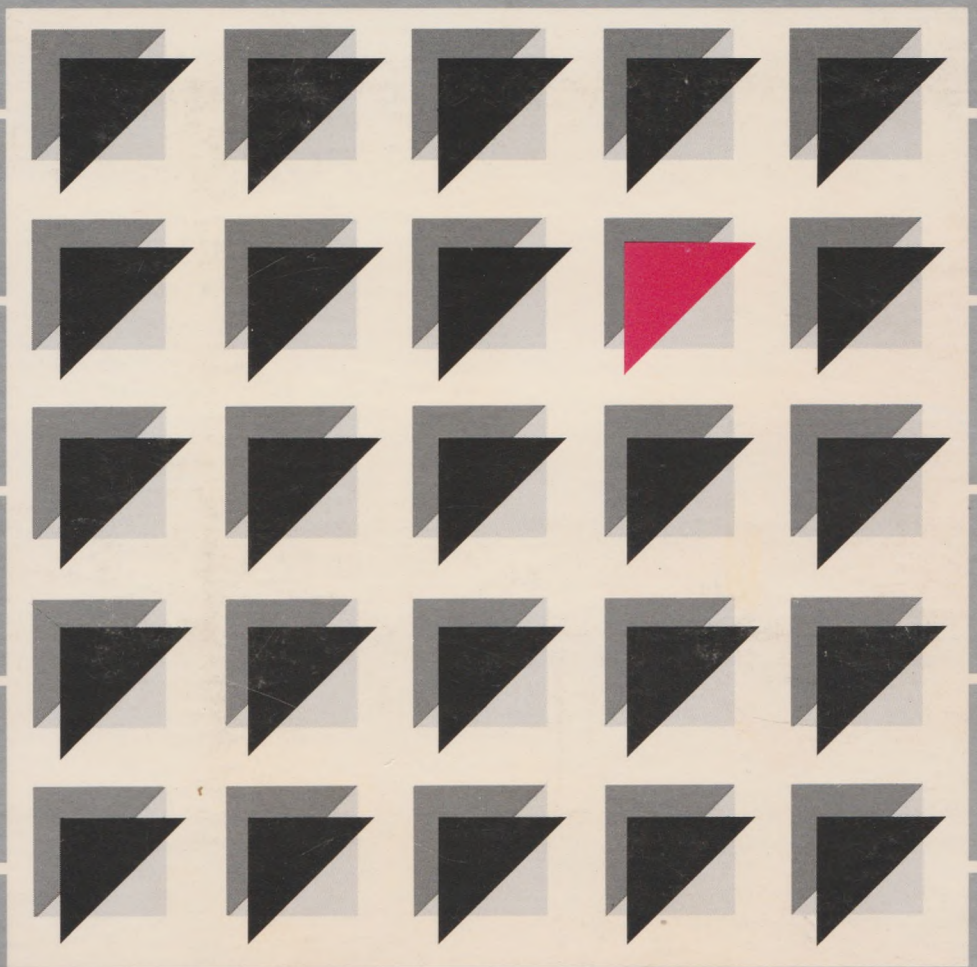
STARTER KIT

NORTHWEST SOFTWARE



NORTHWEST SOFTWARE

621 MINNA STREET, SAN FRANCISCO, CALIFORNIA 94103

This Starter Kit should contain a diskette and a Users Guide. We suggest that you spend a moment with the Users Guide before loading a program. You will find step-by-step loading instructions in the first few pages of the guide.

Northwest Software strives to bring you excellent software at affordable prices. Check your dealer for our other titles.

This kit contains THESE 10 GREAT COMMODORE 64 PROGRAMS!

PERSONAL FINANCE

WORD PROCESSOR: This excellent word processor surpasses most word processing programs because of it's incredible simplicity. You may create, edit, view, merge and print documents from simple letters to reports or manuscripts. This word processor is menu driven and comes complete with electronic documentation.

MAILING LIST: The Northwest Mailing List is similar to the word processor in that it is simple to use and understand. It is a menu driven program that allows you to sort by your own criteria (zip, last name, etc.) and define your own label or report format. Electronic documentation included.

INTRODUCTION TO PROGRAMMING

BASIC PRIMER: This program is designed to introduce you to the fundamentals of BASIC language. It answers the question "What is BASIC?", explains how to use your keyboard, disc drive and tape in detail, and gives you a guide to simple BASIC commands and statements. Learning how to operate your C-64 is made simple for the first time!

INTRO TO THE 6502: The 6502 microprocessor is the heart of the Commodore 64. Everything that the C-64 does in some way effects this device. This program is a non-technical introduction to a very technical aspect of your machine. User should have some knowledge of BASIC.

ENTERTAINMENT

LIGHT CYCLES 64: A great fast action game! Your challenge is to guide yourself through a maze avoiding computer generated obstacles or your partner. Use joystick(s) or your keyboard. Ten levels of speed, can be incredibly fast, lots of color and sound. Have some fun!

REAL ESTATE: Parker Brothers doesn't have a monopoly on the most popular board game of all time! This excellent full-color program is an intelligent family game which enhances play and keeps track of investments, cash flow, etc. One of our all time favorites!

GRAPHICS

KIDDIE GRAPHICS: This introductory program allows your child to draw various illustrations, designs and geometric shapes on the screen using simple commands. It encourages the child to become familiar with the computer in a non-technical and creative way. Program also teaches directional concepts.

SPRITEMAKER: Sprites are objects which can move freely on your screen. This program allows you to create such graphic elements by "painting" them on your screen. The most helpful feature of this simple program is that it automatically converts your graphics to "data" statements which you can integrate with your programs.

SOUND

MUSICMAKER 64: A program that allows you to play or compose your music without programming! It is a multi-voice composer that can even produce a harmony to your music automatically! You may store your compositions on disk or tape to replay them later or play the keyboard like a piano.

PROGRAMMING THE SID: The sound interface device in your Commodore 64 can produce an incredible range of sounds—it can even simulate a human voice! This program is designed to introduce you to this aspect of the Commodore 64 and to instruct in programming this Commodore 64 function. A helpful technical program.

PROGRAMS INCLUDE ELECTRONIC DOCUMENTATION
